

Food Safety Questionnaire

Staff skills & knowledge check — FSANZ Standard 3.2.2A. Every food handler completes this with their trainer or venue manager. Circle one answer per question; the manager marks it, records the score on the Food Handler Training Record, and files this sheet behind it in the venue compliance folder. Pass mark: 12 of 14. Anything missed is talked through on the spot.

Staff name	_____	Venue	_____
Role	_____	Date	_____
Marked by (manager)	_____	Score	_____ / 14

Personal hygiene

1. You have gastro (vomiting or diarrhoea). When can you come back to work handling food?
(a) As soon as you feel better (b) 48 hours after symptoms stop (c) 24 hours after symptoms stop (d) Next rostered shift
2. When must you wash your hands? Pick the best answer.
(a) Before starting work only (b) After the toilet, after handling raw meat, after breaks, after touching your face or phone — and before handling ready-to-eat food (c) Only when they look dirty (d) Every 2 hours
3. You have a small cut on your finger. What do you do?
(a) Keep working if it isn't bleeding (b) Cover it with a brightly coloured waterproof dressing and wear a glove over it (c) Go home (d) Wrap it in a paper towel

Temperature control

4. Cold food must be stored at or below:
(a) 10°C (b) 8°C (c) 5°C (d) 0°C
5. Hot food must be held at or above:
(a) 50°C (b) 55°C (c) 60°C (d) 70°C
6. The freezer should sit around:
(a) -5°C (b) -10°C (c) -18°C or colder (d) Any minus temperature
7. Cooked food is cooling for storage. The rule is:
(a) Room temp to fridge overnight (b) 60°C to 21°C within 2 hours, then 21°C to 5°C within the next 4 hours
(c) Straight into the fridge while steaming, lid on (d) Cool on the bench until cold
8. Ready-to-eat food has been sitting out of temperature control. Under the 2-hour / 4-hour rule:
(a) Under 2 hours: put it back in the fridge. 2–4 hours: use it now. Over 4 hours: bin it (b) Under 4 hours it is always fine (c) It can go back in the fridge any time if it looks OK (d) The rule only applies to meat

Cross-contamination & allergens

9. Where does raw chicken belong in the cool room?
(a) Top shelf (b) Middle shelf, wrapped (c) Bottom shelf, covered, below ready-to-eat food (d) Anywhere with a lid

TARTE.

10. A customer says they have a severe nut allergy. What do you do?

- (a) Tell them everything is probably fine (b) Pick the nuts off (c) Tell the chef / check the allergen matrix, use clean equipment and gloves, and be honest about what we can't guarantee (d) Suggest they order a drink only

11. You used a chopping board for raw prawns and now need to slice strawberries. You:

- (a) Rinse the board under hot water (b) Wipe it with the bench cloth (c) Wash with detergent, then sanitise, then air dry — or grab a clean board (d) Flip the board over

Cleaning, labelling & pests

12. Cleaning and sanitising are:

- (a) The same thing (b) Cleaning removes grime with detergent; sanitising then kills germs — you need both, in that order (c) Optional if surfaces look clean (d) Only for closing shift

13. A prepped container goes into the cool room. It must be labelled with:

- (a) Nothing if you'll remember (b) The chef's initials only (c) What it is plus the date it was made (and use-by where we set one) (d) Just the day dot on the lid

14. You spot mouse droppings in the dry store. What do you do?

- (a) Sweep them up and carry on (b) Tell the manager immediately, isolate/check nearby stock, log it on the pest activity checklist (c) Put bait down yourself (d) Mention it at the end of the week

Manager sign-off: I marked this questionnaire with the staff member, corrected any wrong answers verbally, and recorded the result on their Food Handler Training Record.

Date

Answer key — managers only

Keep this page out of the staff copy. One line per question with the why, so marking doubles as a refresher.

- | | | |
|----|-----|---|
| 1 | (b) | 48 hours symptom-free before handling food (QLD Health exclusion guidance). |
| 2 | (b) | All of those moments matter; gloves are not a substitute for washing. |
| 3 | (b) | Coloured waterproof dressing + glove: visible if it falls off, sealed while you work. |
| 4 | (c) | Cold chain is $\leq 5^{\circ}\text{C}$. |
| 5 | (c) | Hot holding is $\geq 60^{\circ}\text{C}$. |
| 6 | (c) | -18°C or colder keeps food safely frozen. |
| 7 | (b) | The 2-hour/4-hour cooling rule from FSANZ 3.2.2 — matches our cooling log. |
| 8 | (a) | 2-hour/4-hour rule for ready-to-eat food out of temperature control. |
| 9 | (c) | Raw below ready-to-eat, always covered, so nothing drips down. |
| 10 | (c) | Check the allergen matrix, clean gear, honest answer — never guess. |
| 11 | (c) | Wash then sanitise then air dry, or use a separate board. |
| 12 | (b) | Two different jobs, both required, in that order. |
| 13 | (c) | Name + made-on date (use-by where set) — matches the date labelling check. |
| 14 | (b) | Report, isolate, log on the pest activity checklist — same day. |
